

# What is the Average Music Track Length by Genre?

Track length considerably varies among genres with the highest being 2911.78 seconds (Sci Fi & Fantasy), but most genres range from 134.64 seconds (Rock & Roll) to 309.75 (Metal).

(I calculated the median rather than the average because video based genres such as TV Shows/ Sci Fi and the like would have massively skewed the average)

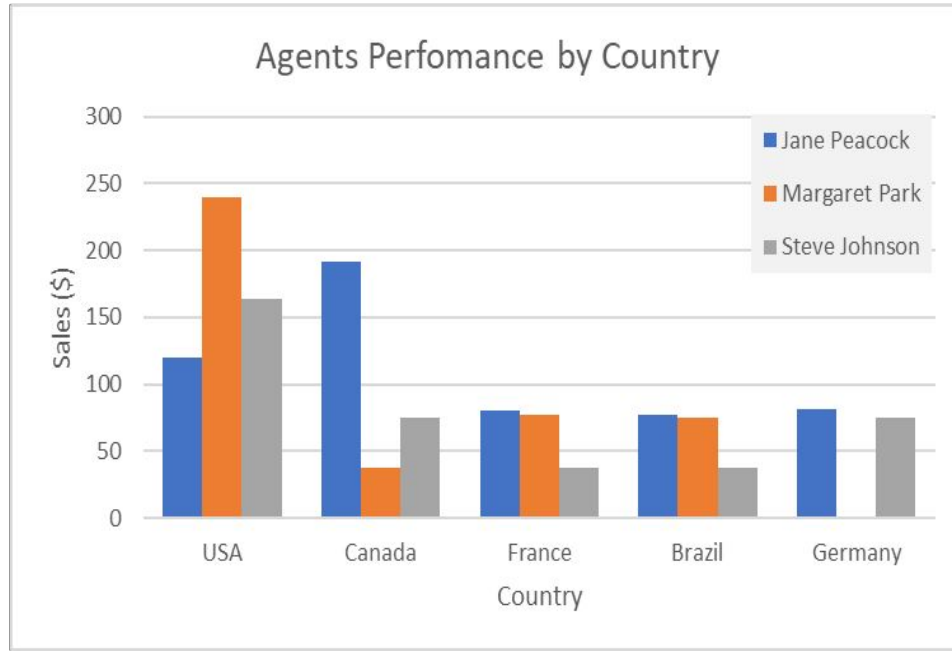

# What are the Top Genres in our Top 5 Countries?

At least 80% of sales in our top 5 countries are spread across 5-7 genres in each country, though mostly dominated by Rock and Latin genres.

Rock and Latin listeners generate between 48%-71% of sales in our top 5 countries.

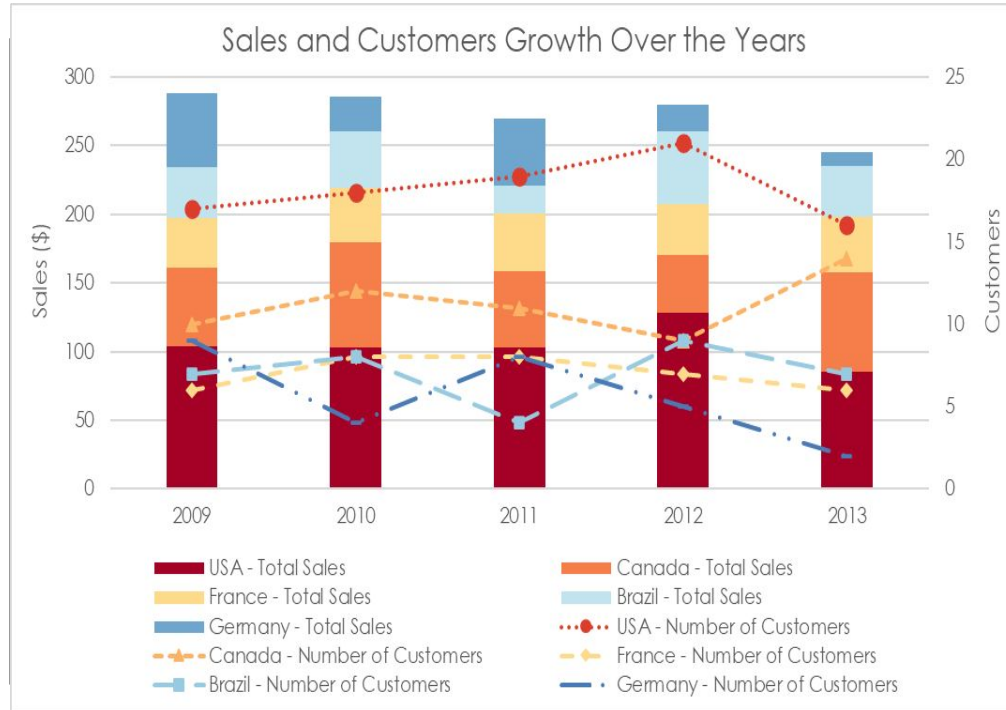

# How Did Agents Fare in our Top 5 Countries with Most Sales?

We notice that Jane Peacock performs better in almost all top 5 countries except in USA where Margaret Park performs significantly better.

Also, apparently, there are countries in which not all agents work, such as Germany.

# Sales and Customers Growth Over the Years in our Top 5 Countries

Aside from year 2012, sales have been declining year on year.

Of our top 5 countries, USA has been our biggest market over the years in terms of both sales and customers, while Germany has been relatively the smallest.
